

The screenshot displays the Visual Studio Code interface. On the left, the Explorer sidebar shows a project named 'BELAJAR PROGRAMMING ...' with a subdirectory 'belajar_dart_dasar' containing a 'bin' folder. The 'bin' folder is expanded, showing several Dart files, with 'branching.dart' selected. The main editor area shows the content of 'branching.dart', which is a Dart program using conditional statements (if, else-if, and else) to print values based on a variable 'nilai'. The program is executed, and the output is visible in the 'DEBUG CONSOLE' panel at the bottom. The output shows 'Nilai B', 'Nilai C', and 'Exited'.

```
//Branching (IF, IF, dan ELSE-IF)
Run | Debug
void main(List<String> args) {
  var nilai=55;
  if(nilai>70){
    print('Nilai A');
  }
  if(nilai>40){
    print('Nilai B');
  }
  if(nilai>0){
    print('Nilai C');
  }
  else{
    print('...');
  }
}
```

DEBUG CONSOLE

Nilai B
Nilai C
Exited
